

## **Statement from the director of the Institute of Scientific Instruments on the final report of Commission No. 8.**

We thank the members of Commission No. 8 for their enormous effort, their detailed Report with a deep understanding of the Institute and its individual Teams. We are happy to read their very positive judgment about the evaluated research teams: No. 1 - Electron microscopy; No. 2 - New technologies; No. 3 - Magnetic resonance and cryogenics; No. 4 - Medical signals; No. 6 - Coherent optics, as well as the positive judgement of the entire Institute, even in the broader international context.

We have no comments on the Final report of the Evaluation of the Research and Professional Activity of the Institute for the period of 2010–2014. Additionally, we have no comments on the Final reports of the individual teams.

12th February, 2016

Ilona Müllerová  
Director of the Institute of Scientific Instruments
